CONTENTS

Volume 69 (1990)

PHYSIOLOGY AND BIOCHEMISTRY

Monoclonal antibodies to spinach ascorbate peroxidase and immunochemical detection of the enzyme in eight different plant species
by H. Saji, K. Tanaka and N. Kondo (Ibaraki, Japan) 1–9

Elicitor-like activity of the toxic glycoprotein isolated from *Rhynchosporium secalis* (Oud.) Davis culture filtrates
by C. Mazars, C. Lafitte, P.Y. Marquet, M. Rossignol and P. Auriol (Toulouse, France) 11–17

Measurement and detection of peroxidase
by R. Van Huystee, C. Breda, P. Sesto, N. Beopouolos and R. Esnault (Ontario, Canada and Gif-sur-Yvette, France) 19–26

Hydroxyproline and proline content of cell walls of sunflower, peanut and cotton grown under salt stress
by A. Golan-Goldhirsh, B. Hankamer and S.H. Lips (Sede Boqer Campus, Israel) 27–32

The effect of selected inhibitors on plasma membrane redox reactions and proton excretion by carrot cells
by R. Barr, M. Bottger and F.L. Crane (West Lafayette, IN) 33–38

Comparison of certain properties of membrane bound and solubilized acyltransferase activities of plant microsomes
by M. Frentzen (Hamburg, F.R.G.) 39–48

GENETICS AND MOLECULAR BIOLOGY

Electrophoretic studies of genetic variation in natural populations of allogamous *Hedysarum capitatum* and autogamous *Hedysarum euspinosissimum*
by H. Baatout, M. Marrackchi and J. Pernes (Tunis, Tunisia and Paris, France) 49–64

Light-regulation of phosphoenolpyruvate carboxylase mRNA in leaves of C4 plants: evidence for phytochrome control on transcription during greening and for rhythmicity
by M. Thomas, C. Cretin, J. Vidal, E. Keryer, P. Gadal and E. Mosinger (Orsay, France and Basle, Switzerland) 65–78

Agrobacterium-mediated transformation of the cultivated strawberry (*Fragaria* × *anannassa* Duch.) using disarmed binary vectors
by D.J. James, A.J. Passey and D.J. Barbara (Maidstone, U.K.) 79–94

Studies on the genetic basis of resistance to potato leaf roll virus, potato virus Y and potato virus X in *Solanum brevidens* using somatic hybrids of *Solanum brevidens* and *Solanum tuberosum*
by E. Pehu, R.W. Gibson, M.G.K. Jones and A. Karp (Harpenden, U.K.) 95–101

Comparison of electric field mediated DNA-uptake- and fusion properties of protoplasts of *Solanum tuberosum*
by G. Van Der Steege and M.J. Tempelaar (Haren, The Netherlands) 103–110

Isolation of flower-specific cDNA clones from sunflower
by F. Herdenberger, J.-L. Evrard, M. Kuntz, L.-H. Tessier, A. Klein, A. Steinmetz and D.T.N. Pillay (Strasbourg, France and Windsor, Canada) 111–122

CELL AND TISSUE STUDIES IN VITRO

A comparison of AMP-induced micronucleation and influence of some factors in various genotypes of potato and *Nicotiana*
by K.S. Ramulu, H.A. Verhoeven, P. Dijkhuis and L.J.W. Gilissen (Wageningen, The Netherlands) 123–133

PHYSIOLOGY AND BIOCHEMISTRY

Effect of ionophore A23187 on plasma membrane integrity in isolated protoplasts of *Avena sativa*
by A. Kell and E. Donath (Berlin, Germany) 135–138

Proton-translocating ATPase activity in plasma membrane vesicles from roots of grapevine seedlings
by R. Pinton, Z. Varanini and A. Maggioni (Udine and Viterbo, Italy) 139–145

Polyphosphoinositidase activity in soybean membranes is Ca^{2+}-dependent and shows no requirement for guanine-nucleotides
by M. Biffin and D.E. Hanke (Cambridge, U.K.) 147–155

Correlation between CuZn superoxide dismutase and glutathione reductase, and environmental and xenobiotic stress tolerance in maize inbreds
by C. Malan, M.M. Greyling and J. Gressel (Pretoria, South Africa and Rehovot, Israel) 157–166

Hormonal and light regulation of the multiple amylase isozymes during seed germination and in vegetative tissues of *Zea mays*
by B. San Segundo, J. Ma Casacuberta and P. Puigdomenech (Barcelona, Spain) 167–177

Partial purification and characterization of stachyose synthase in leaves of *Cucumis sativus* and *Cucumis melo*: utilization of a rapid assay for *myo*-inositol
by J.L.A. Huber, D.M. Pharr and S.C. Huber (Raleigh, NC) 179–188

GENETICS AND MOLECULAR BIOLOGY

Selection of interspecific somatic hybrids for *Medicago* by using *Agrobacterium*-transformed tissues
by M.R. Thomas, L.B. Johnson and F.F. White (Adelaide, Australia and Manhattan, KS) 189–198

Genetic transformation of *Citrus* protoplasts and regeneration of transgenic plants
by A. Vardi, S. Bleichman and D. Aviv (Bet Dagan and Rehovot, Israel) 199–206

CELL AND TISSUE STUDIES IN VITRO

Histological aspects of in vitro root and shoot differentiation from cotyledon explants of *Brassica juncea* (L.) Czern
by K.K. Sharma and S.T. Bhojwani (Delhi, India) 207–214

Somatic embryogenesis in immature embryos and protoplasts of *Pinus caribaea*
by E. Laine and A. David (Amiens, France) 215–224

Control of cell proliferation and differentiation by modulators of ethylene biosynthesis and action in *Brassica* hypocotyl explants
by U. Sethi, A. Basu and S. Guha-Mukherjee (New Delhi, India) 225–229

The selection of chlorsulfuron-resistant cell lines of independent origin from an embryogenic cell suspension culture of *Brassica napus* L.
by P.K. Saxena, D. Williams and J. King (Saskatoon, Canada) 231–237

Comparative analysis of translatable mRNA populations in zygotic and pollen-derived embryos of barley (*Hordeum vulgare* L.)
by P. Higgins and D.J. Bowles (Leeds, U.K.) 239–247

Onion is a monocotyledonous host for *Agrobacterium*
by E.M. Dommisse, D.W.M. Leung, M.L. Shaw and A.J. Conner (Christchurch, New Zealand) ....
